

GET YOUR WORK DONE ON DEMAND

Techadox is your total workforce solution.

Techadox is the only technology platform that provides managed delivery and assisted insourcing to meet your business total field service needs. Here you can access contingent labor to work on your projects alongside you or in the field while optimizing time and resources.

Save Money

By engaging contingent labor directly

Save Time

By combining parts, labor, and logistics

Be Secure

with the only guaranteed contingent labor partner

Field. Technology. Connected.

Existing contingent labor boards leave clients at the whim of the technicians with no controls in place to ensure the quality of work, or even if the work gets done. Until now, there was no easy way for large companies and enterprise customers to engage the contingent labor workforce in an environment designed for their specific needs.

Techadox features a contingent labor platform trademarked “Labor as a service”, backed by 24/7 help desk and full spectrum project support. We offer clients familiar managed service environment, including parts and logistics, while realizing the money and time saving benefits of contingent labor.

“While 66 percent of companies believe their use of off-balance sheet talent will grow significantly in the next 3-5 years... 49 percent say they are not able to manage contingent labor well and 55 percent say they have never used or do not understand how to leverage crowdsourcing.”
