

VETERANS KNOW TECHNOLOGY.

ABOUT TECHADOX

Techadox is building a diverse pool of highly skilled information technology professionals and matching them with companies that need smart hands support for break/fix, IMAC, project work and more.

Register on the TDX Labor-As-A-Service platform as an independent "TDX Pro" Technician, complete your work experience profile and immediately gain access to IT work orders available in your area that match your skill sets.

BRIDGE THE GAPS IN THE TRANSITION FROM MILITARY TO CIVILIAN CAREER.

Techadox utilizes the talent of experienced Veterans that are interested in working on projects in the information technology sector. Whether you are an independent business owner or you're actively searching for full-time employment elsewhere, Veterans can earn extra money and utilize their technical certifications by engaging in our client's IT projects and field service work-orders nationwide.

ACTIVE WORK FOR MILITARY SPOUSES.

Does your spouse have experience in IT? Our TDX Platform provides the flexibility military spouses demand - choose when and where work orders are accepted and successfully work around your personal and military commitments.

This creates a win-win relationship between Veterans (and their spouses) who are looking to utilize their technology experience and corporations that are in need of highly skilled professionals to support their IT field service work.
