Business Enterprise

ABOUT TECHADOX

The leading on-demand labor marketplace for highly skilled technical labor that matches Technology Service Professionals with businesses that require contingent labor resources.

We offer clients and skilled IT technicians a streamlined way to scale their managed service business while realizing the money, time savings and flexible work benefits of contingent labor.

A NEW WAY OF DELIVERING FIELD SERVICE SOLUTIONS

Until now, there was no easy way for service providers and enterprise customers to engage the contingent labor workforce in an environment designed for their specific needs.

Our TDX Marketplace is a robust and flexible online contingent labor platform that revolutionizes the way you engage the on-demand workforce - bridging the service gaps that exist in other online labor platforms. We are laser-focused on the successful resolution of your field service event, not just providing you with a technical resource to dispatch.

Techadox invites you to learn how simple registration on our labor-as-a-service marketplace can accelerate your business growth, saving you time and reducing costs.
